

Carlie Anglemire

917-488-5240 | carlie.anglemire@gmail.com | [Github](#) | [Blog](#) | [LinkedIn](#)

Full stack web developer who is passionate about exercising problem-solving skills and creativity in building user-friendly web applications. A programmer with experience in Ruby, Ruby on Rails, JavaScript, React, and SQL, I discovered software engineering while developing my logic, critical thinking, and language skills as a Philosophy PhD. With the ability to communicate clearly and effectively and a drive to get things done, I am eager to help companies implement innovative technical projects that enhance people's lives.

TECHNICAL SKILLS

JavaScript, React, Ruby on Rails, Ruby, SQL, HTML, CSS

TECHNICAL PROJECTS

Plan a Garden - [Garden App](#) | [Garden App API](#) | [Demo](#)

Garden-planning app allowing users to imagine a garden they would like to create in real life while building a virtual one

- Utilized Ruby on Rails to create an API that is rendered as JSON
- Stored data including updates, posts, and deletes from forms on the front-end using Ruby on Rails
- Built front-end functionality with React and React Router and styled the front-end with custom CSS

Book and Movie Memory Bank - [Book and Movie Memory Bank](#) | [Book and Movie Memory Bank API](#) | [Demo](#)

A log for books and films to keep a record of materials that may be useful during course-planning and essay-writing

- Created an API with Ruby on Rails
- Displayed data in indexes fetched from two different models on the back-end
- Programmed front-end functionality including controlled forms and a search bar, using JavaScript and React

National Parks Trip Planner [National Parks App](#) | [National Parks App API](#) | [Demo](#)

An app that whets users' appetite for adventure while they plan trips to National Parks

- Implemented a Ruby on Rails backend that uses a key to fetch from the National Park Service API
- Set up the app to utilize local storage for some information while a user is logged in for a user-friendly experience
- Engineered front-end functionality including a search bar, filters, and routes using React and React Router
- Enabled JWT token authentication, Bcrypt, and Dotenv-rails to make login and sign up secure
- Incorporated images that are in the public domain sourced from the New York Public Library Digital Collections

WORK EXPERIENCE

Visiting Instructor, **Pratt Institute**, Brooklyn, NY 08/2016-12/2018

- Taught courses including Philosophy & Film, Philosophy of Literature, and Problems in Philosophy
- Designed interdisciplinary syllabi to center class discussions on works of philosophy, literature, and film

Instructor, **Western Connecticut State University**, Danbury, CT 01/2017-12/2018

- Authored curriculum for courses including Introduction to Philosophy, Introduction to Ethics, Ethical Issues in Healthcare, Philosophy of Death & Dying, Philosophy in Film, Philosophical Issues in Literature, Philosophy of Self, and Love in Western Civilization

EDUCATION

Flatiron School, Brooklyn, NY 10/2019-02/2020

Full Stack Web Development, Ruby on Rails, JavaScript, React, SQL

Stony Brook University, Stony Brook, NY 08/2011-12/2017

Ph.D. Philosophy, Focus on Ethics and Aesthetics

DePaul University, Chicago, IL 09/2004-06/2008

Bachelor of Arts (BA), Philosophy and French, Magna Cum Laude, Honors Program
