Full stack software engineer who uses problem-solving skills and creativity in building applications to help people gain access to online resources. Working for a software company centered on women's health and prenatal care, I leverage logic and critical thinking skills I developed as a student of natural languages and Philosophy. With strong communication and collaboration skills, I use my technical knowledge to support companies providing vital services to clients.

TECHNICAL SKILLS

JavaScript, Ruby, Ruby on Rails, Vue, React, Python, HTML, CSS, PHP, C, Java, SQL, Bcrypt, JWT, JSON API

WORK EXPERIENCE

Junior Software Engineer, **Dorsata**, Remote | 09/2021 - currently

- I work as a full-time engineer for a software company centered on women's health and prenatal care.

Software Engineer Contractor, New York, NY | 10/2020 - 12/2020

- Built a PHP plug-in to update the WordPress website of a major national trade group
- Handled searches of the company's directory and optimized the display for different screen sizes using Flexbox

Visiting Instructor, **Pratt Institute**, Brooklyn, NY | 08/2016 - 12/2018

- Taught courses including Philosophy & Film, Philosophy of Literature, and Problems in Philosophy
- Designed interdisciplinary syllabi to center class discussions on works of philosophy, literature, and film

Instructor, **Western Connecticut State University**, Danbury, CT | 01/2017 - 12/2018

- Authored curriculum for Intro. to Philosophy, Intro. to Ethics, Ethical Issues in Healthcare, Philosophy of Death & Dying, Philosophy in Film, Philosophical Issues in Literature, Philosophy of Self, and Love in Western Civilization

EDUCATION

Google/Coursera, Crash Course on Python Certificate | 09/2020 - 10/2020

Flatiron School, Brooklyn, NY | 10/2019 - 02/2020

Stony Brook University, Stony Brook, NY | 08/2011 - 12/2017

Ph.D. Philosophy | Focus on Ethics and Aesthetics | Dissertation: *Panorama and Proximity in Levinas and the Stoics*

DePaul University, Chicago, IL | 09/2004 - 06/2008

Bachelor of Arts (BA), Philosophy and French, Magna Cum Laude, Honors Program

TECHNICAL PROJECTS

National Parks Trip Planner | [National Parks App](#) | [National Parks App API](#) | [Demo](#)

An app that whets users' appetite for adventure while they plan trips to National Parks

- Created a Ruby on Rails backend that uses a key to fetch from the National Park Service API
- Engineered front-end functionality including a search bar, filters, and routes using React and React Router
- Enabled JWT token authentication, Bcrypt, and Dotenv-rails for secure login and sign up

Book and Movie Memory Bank | [Book and Movie Memory Bank](#) | [Book and Movie Memory Bank API](#) | [Demo](#)

A log for books and films to keep a record of materials that may be useful during course-planning and essay-writing

- Implemented an MVC design pattern to build a single-page application with a Ruby on Rails API
- Programmed front-end functionality including controlled forms and a search bar using JavaScript and React

Plan a Garden | [Garden App](#) | [Garden App API](#) | [Demo](#)

Garden-planning app allowing users to imagine a garden they would like to create in real life while building a virtual one

- Utilized Ruby on Rails to create an API rendered as JSON with full CRUD capabilities
- Built front-end functionality including controlled forms with React and React Router

Coronavirus Medical Supply Donation App | Spark + AI Summit 2020 Hackathon for Social Good | May - June 2020

- Collaborated with a UX/UI designer and another developer to create an app using JavaScript, React, and Node.js to connect donors and those in need of medical supplies such as face masks
