Full stack web developer passionate about exercising problem-solving skills and creativity to build applications that help users gain access to information, entertainment, resources, and social networks on-line. A programmer with experience in JavaScript, Ruby, Java, C, React, Ruby on Rails, and SQL, I became interested in software engineering after developing my logic and critical thinking skills as a Philosophy PhD. With strong communication skills and a drive to get things done, I am ready to help companies implement technical projects that enhance people's lives.

TECHNICAL SKILLS

JavaScript, React, Ruby, C, Java, Ruby on Rails, SQL, HTML, CSS

TECHNICAL PROJECTS

National Parks Trip Planner [National Parks App](#) | [National Parks App API](#) | [Demo](#)

An app that whets users' appetite for adventure while they plan trips to National Parks

- Implemented a Ruby on Rails backend that uses a key to fetch from the National Park Service API
- Set up the app to utilize local storage for some information while a user is logged in for a user-friendly experience
- Engineered front-end functionality including a search bar, filters, and routes using React and React Router
- Enabled JWT token authentication, Bcrypt, and Dotenv-rails to make login and sign up secure

Book and Movie Memory Bank- [Book and Movie Memory Bank](#) | [Book and Movie Memory Bank API](#) | [Demo](#)

A log for books and films to keep a record of materials that may be useful during course-planning and essay-writing

- Followed an MVC design pattern to build a single-page application
- Created an API with Ruby on Rails and displayed data in indexes fetched from different models on the back-end
- Programmed front-end functionality including controlled forms and a search bar using JavaScript and React

Plan a Garden - [Garden App](#) | [Garden App API](#) | [Demo](#)

Garden-planning app allowing users to imagine a garden they would like to create in real life while building a virtual one

- Utilized Ruby on Rails to create an API rendered as JSON
- Stored data including updates, posts, and deletes from forms on the front-end using Ruby on Rails
- Built front-end functionality with React and React Router and styled the front-end with custom CSS

Coronavirus Medical Supply Donation App

Spark + AI Summit 2020 Hackathon for Social Good | May-June 2020

- Worked with a UX/UI designer and another developer to create an app to connect donors and those in need of medical supplies such as masks

WORK EXPERIENCE

Visiting Instructor, **Pratt Institute**, Brooklyn, NY 08/2016-12/2018

- Taught courses including Philosophy & Film, Philosophy of Literature, and Problems in Philosophy
- Designed interdisciplinary syllabi to center class discussions on works of philosophy, literature, and film

Instructor, **Western Connecticut State University**, Danbury, CT 01/2017-12/2018

- Authored curriculum for Intro. to Philosophy, Intro. to Ethics, Ethical Issues in Healthcare, Philosophy of Death & Dying, Philosophy in Film, Philosophical Issues in Literature, Philosophy of Self, and Love in Western Civilization

EDUCATION

Flatiron School, Brooklyn, NY 10/2019-02/2020

Full Stack Web Development | JavaScript, React, Redux, Ruby, Ruby on Rails, SQL, Sinatra, HTML, CSS

Stony Brook University, Stony Brook, NY 08/2011-12/2017

Ph.D. Philosophy | Focus on Ethics and Aesthetics | Dissertation: *Panorama and Proximity in Levinas and the Stoics*

DePaul University, Chicago, IL 09/2004-06/2008

Bachelor of Arts (BA), Philosophy and French, Magna Cum Laude, Honors Program
